

# The Arnold Group's LYON COUNTY EMPLOYMENT IMPACT ANALYSIS

The job market in 2023 remains tight as the unemployment rate hovers near historic lows. Even amid layoffs in some sectors, many organizations are hiring, with job openings near historic highs and outnumbering candidates nearly 2-to-1. Employers continue to struggle to find qualified help as the talent pool remains suppressed and quit rates remain high (averaging 4M per month) leaving the onus on employers to boost recruiting and retention efforts. Among those most likely to make a move are 18- to 29-year-olds and employees with less than 4 years of tenure. The potential and clear path for career advancement within an organization could help retain workers. In Kansas, we're seeing a slowly expanding labor force with a slight decrease of job openings and a static unemployment rate of 2.9%. The Arnold Group continues to monitor the labor market and assisting organizations with their current and evolving workforce challenges.
